INTERIM DIVIDEND

FINANCIAL RESULTS

The Company continues to refine its business strategy in 2007. Its performance for the first half of the year demonstrated the Company's ability to balance challenges and opportunities across our businesses to deliver creditable financial results. Having completed the restructuring of our South China operations in 2006, the Company has since announced the closure of its brewing operations in Hong Kong sometime end-September 2007. Production capability will be transferred to our Foshan (Shunde) brewery in PRC, where the Company can meet consumer demand better while streamlining operations, improving capacity utilization and gross margins for the business. Collectively, our restructuring initiatives are designed to result in improved efficiencies and fixed cost savings that align with our strategy of strengthening long-term operating performance.

For the first six months of 2007, consolidated volume and turnover were 13.0% and 3.7% behind 2006 respectively, due largely to lower export volumes and the short supply of Guang's pineapple beer in Guangzhou. Despite this, consolidated gross profit margin improved and increased from 44.1% to 51.1%, a direct result of our decision to push for high-priced products in our South China operations.

Consolidated loss after taxation attributable to equity shareholders of the Company for the six months ended 30 June 2007 was HK\$3.7 million against last year's reported loss of HK\$22.6 million. This, however, included a one-time restructuring cost for South China operations of HK\$5.1 million after minority interests in 2006. Without the restructuring cost in 2006, consolidated loss for the same period last year would have been HK\$17.5 million.

The Company remains cash positive in 2007. Net cash balances at 30 June 2007 amounted to HK\$215.7 million. Total net assets are maintained at HK\$1,990.8 million, along with a low debt-to-equity ratio of 0.11 and current ratio of 2.24 times.

BUSINESS REVIEW

HONG KONG OPERATIONS

The growing popularity of wine and whisky continued to chisel away at beer's share of alcoholic beverage market. As of June 2007, the beer industry suffered a volume decline of 3.3% over the same period last year. However, the Company has performed ahead of the industry and recorded an overall 0.5% gain in market share (Source: AC Nielsen Retail Audit in June 2007).

Total local sales volume for the first six months of 2007 was almost at par with 2006. Nevertheless, the San Miguel brand still possesses strong brand equity, recording double-digit growth in both May and June 2007, which largely mitigated the decline in volumes to 4.6% over the same period last year. Our imported premium brands' volumes grew 21.3%, while low-priced brands grew at a slower 1.4%. Macau continued to maintain a double-digit volume growth over the previous year.

In June 2007, the Company proposed to restructure the Group's production logistics with a view to improving the long-term profitability of the Group. With the relatively high production and operating cost of the Yuen Long brewery compared to our South China brewery, it has been decided that the Yuen Long brewery will cease brewing operations sometime end-September 2007 and that the Group will utilise instead its Foshan (Shunde) brewery in the PRC after closure of brewing operations at the Yuen Long brewery. Management is now formulating a detailed restructuring plan, including the alternative deployment of the Yuen Long brewery and the relevant assets. The Company will make further announcements with respect to the restructuring proposal in accordance to the disclosure requirements under the Listing Rules.

Building on the huge success of "San Miguel WildDayOut", the Company has organized more WildDayOut bar shows in the first half of 2007 to solidify the brand San Miguel communication platform to young consumers. Together with the giant neon-sign atop the Excelsior Hotel at Causeway Bay, sponsorship of popular movies and stepped-up market wide promotion activities in Chinese restaurants, retail chains and provisional stores, San Miguel continues to reinforce its brand presence in the local beer market.

For the remainder of 2007, the Company will launch a new marketing campaign for brand San Miguel, which including new themed television commercials complemented with similarly-themed market promotions to ensure its leadership position and meet the challenges of the market.

SOUTH CHINA OPERATIONS

South China operations recovered strongly after the restructuring in 2006: turnover grew by 5.2% over previous year and recorded a profit before tax of HK\$7.4 million against a loss of HK\$19.0 million in 2006.

San Miguel (Guangdong) Brewery Company Limited ("SMGB") continued its growth momentum during the first six months of 2007. Sales volume increased by 84.3% over the previous year, mainly driven by double-digit growth of Dragon and Valor brand. A new packaging of Dragon Gold was introduced to the local beer market to further enhance its product competitiveness. Dragon brand preference was further sustained in Shunde developing counties and roll-out regions through various market-wide promotional activities. SMGB has also completed a review of its selling and distribution activities and incentive scheme to support the selling of higher-priced products and to rationalise its advertising and promotion expenses in Dongguan.

Phase I of the expansion of the brewery facility of SMGB is almost complete, increasing annual brewing capacity to 1.3 million hectoliters, just in time for the peak season. In the mean time, SMGB has also started on Phase II of the expansion program last May 2007 and this will increase brewing capacity to 2.3 million hectoliters. Phase II is targeting for completion by the end of first quarter 2008.

Meanwhile, Guangzhou San Miguel Brewery Company Limited ("GSMB") also recorded a double-digit volume growth of San Mig Light during the first six months of 2007. However, the short supply of Guang's pineapple beer in the second quarter of 2007 resulted in overall decrease of 26.9% in GSMB's total sales volume.

During the first six months of 2007, GSMB continued to invest in above-the-line campaigns and market wide consumer promotions for San Mig Light to drive brand awareness and preference. The Company was able to secure volumes in Chinese restaurants in downtown Guangzhou and Dongguan, thus paving the way for our plan to rebuild San Miguel brand. In addition, GSMB converted its wholesale-based operations to retail-based model in Guangzhou and Foshan, and was able to stabilize wholesale prices through better control of cross boundary selling.

For the remainder of 2007, SMGB will capitalize on the growth momentum to further increase penetration in roll-out regions and gain market share in the fast growing supermarket segment. SMGB will also launch the Dragon television commercial to continue to sustain brand awareness and preference in Shunde and selected roll-out markets. Meanwhile, GSMB will launch a new marketing campaign to reinvigorate the San Miguel brand. Resources will also be prioritized to high volume outlets to improve overall yield per outlet and to night outlets to improve presence and volume.

OUTLOOK

The outlook for the rest of the year remains positive. Our recent restructuring efforts should help create a solid foundation for the Company's future growth. Clearly, we still have more work to do to drive the Company towards improved profitability. Nevertheless, with our highly motivated teams both in Hong Kong and South China, we remain committed to our promise of becoming a company that will perform consistently year after year.
